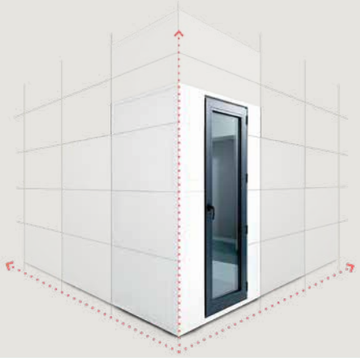
Your custom booth

We make your dream space come true, regardless of its size.

Design your booth

Design your ideal workspace with our experts in just 4 steps. Our projects include detailed plans and 3D renderings. Our custom booths ensure a balanced and productive office..



1. Size

- → From 1 m2 to 50 m2 of surface area and maximum 3.9 m in height.
- → No matter the purpose, we tailor your private space to meet your specific needs—be it a yoga room, a cozy coffee corner, or a tranquil relaxation area in your office!

2. Doors and windows

- → Lockable door (mechanical or electronic)
- → Normal or frosted glass
- → Add more doors and windows
- → Left or right hand opening
- → Inward opening*

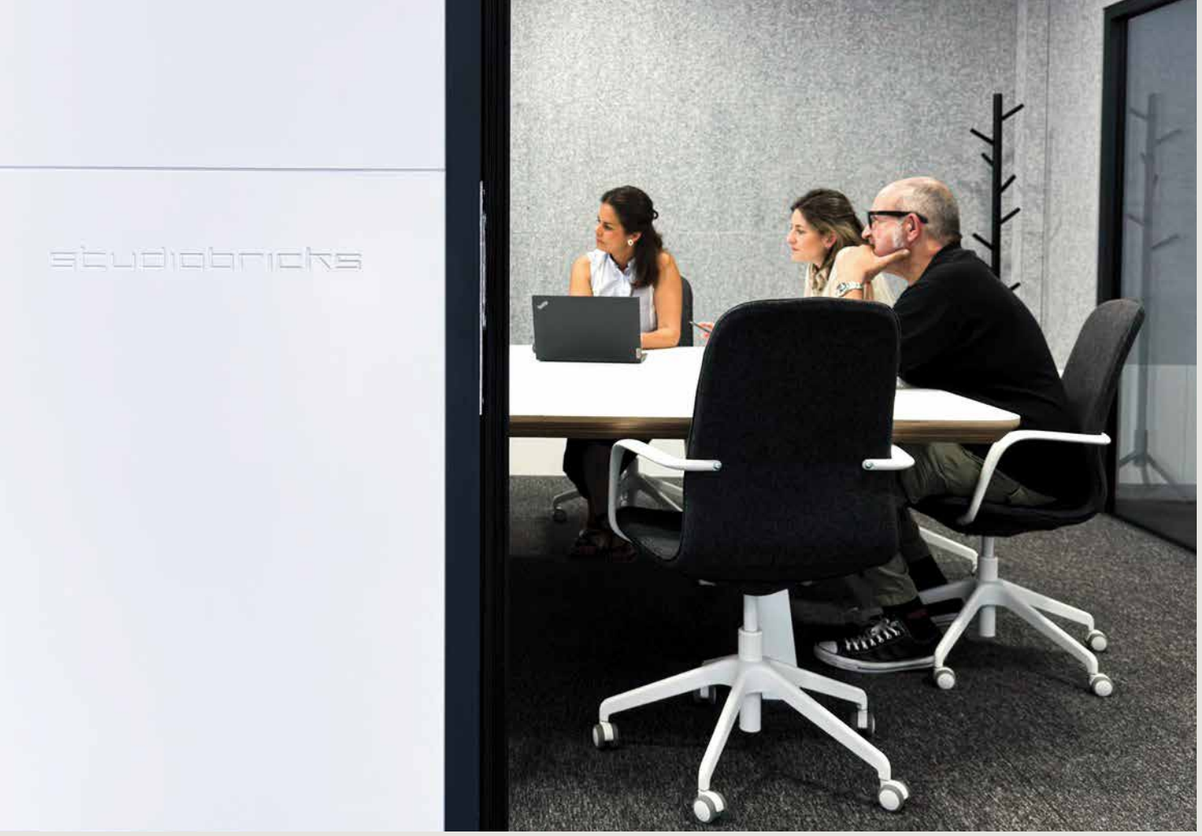
* Only for large booths

3. Color and finishings

- → HPL or lacquered laminate finish
- → Interior finish (acoustic materials and colours)
- → Carpet

4. Furniture and accessories

- → Seats
- → Table
- → Videocall and presentation monitor
- → Plugs and ports for data and electrical configuration.



We treat our customers like family with the utmost commitment to offer you the best solution. The Studiobricks team as well as our distributors are available to help with any request in the most honest way possible. We are proud to have strong and long-lasting relationships with our customers and we continue to strive every day to offer the best product, so that they can achieve the best results in their work.

15 years of unwavering passion

1. Passion for the saxophon

Guillermo, CEO of Studiobricks, was in search of a rehearsal space with optimal acoustics in his Barcelona apartment that wouldn't disturb neighbors. Frustrated with the lack of quality booths in the market, a team of acoustic experts, engineers, architects, and carpenters joined forces to tackle Guillermo's challenge.

2. The birth of Studiobricks' first booth

After numerous tests and prototypes, the legendary Studiobricks booth was born in November 2008. A unique booth in the market with a modular design of manageable pieces without the need for screws, all thanks to the patented system we call BRICK.

3. The magic of BRICK

The versatility and quality of Studiobricks are thanks to the BRICK patent, providing the possibility for the booths to be assembled and disassembled effortlessly without compromising their isolation quality. Each BRICK serves a dual purpose as an isolated wall piece and a sound-absorbing cladding, ensuring optimal interior acoustic performance.

4. Global power of silence

Headquartered and with a factory in Barcelona, Studiobricks expands its commercial network worldwide with its minority partner Laurent Decroix. In 2015, Miguel Donoso-Cortés founded Studiobricks USA Inc. to further expand from New York. Currently, Studiobricks ships booths to 49 countries around the globe.

5. The perfect solution for offices

At the end of 2018, Studiobricks received a request to manufacture more than 5.000 booths for calls for the multinational company WeWork Coworking Spaces. This milestone marked the beginning of Studiobricks Office Solutions, offering booths that improve productivity and well-being in offices.

6. Sustainable and durable booth

By choosing Studiobricks, you are not only choosing a high-quality acoustic booth, but also a sustainable and planet-friendly option. We use recycled and sustainable materials, water-based paints, silicone and neutral glues. In addition, we are continuously working to improve our processes (EcoVadis certified) to reduce our environmental impact. We work with local suppliers and our facilities include a biomass heating system, a 100 kW photovoltaic plant and a 60-metre lacquering line designed to generate no waste.
